BLACK MONEY

Black money refers to funds earned on the black market, on which income and other taxes have not been paid.

A black market or underground economy is the market in which goods or services are traded illegally.

Corruption is also part of black money whether it is done by politician, administration or public.

Black money should be distributed in public

This amount could have gone to public if they had paid tax so ultimately public has right to use this amount

This is nothing, because of this black money Indian public couldn't get all facilities like water, electricity, roads, medical so and so.

If we have look at Farmers, beggars, venders, vegetable seller and labors then we will see the actual picture of India, By distributing this money to all them we can change their life stile.

Black money shouldn't be distributed in public

Once we give free to the public then they will be habitual to take everything free and crime will be increased.

We will repeat same mistake, we should not forget that public is also responsible for black money and we give them directly it not permanent solution of their problems.

Tax is not distributed, it is collected to build nation and maintain our economy. India is still a developing country.
