

**Odd and Even formula can control
pollution or not ?**

Odd and Even formula can control pollution

- ❑ We are suffering from pollution like water pollution, soil pollution, global warming, noise pollution, depletion ozone layers etc. So CM of Delhi has taken good steps against air pollution.
- ❑ I think so half of vehicle of moving in city will decrease then definitely smoke will decrease.

Odd and Even formula can not control pollution

- ❑ It is not problem of even and odd. It is problem of air pollution.
- ❑ It is problem of vehicles which give smoke. We are blaming only vehicles but also factories give smoke.
- ❑ Problem is in vehicles so people should get their vehicles repaired this better idea and they must be aware about their vehicles.

Thank you
